

About

Refuel is a 24/7 emergency or not, fuel refilling service—on road, if you've run out of petrol or at home if you wish to avoid the long and tedious queues at the petrol pumps.

Fuel Refilling - 24/7

**EMERGENCY OR NOT, WE
DON'T JUDGE!**

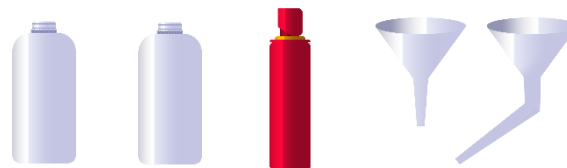

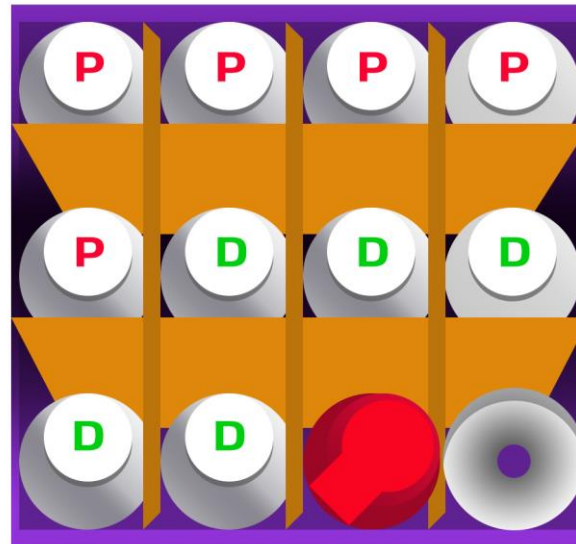

i@refuel.in

THE CONTENT

A typical Refuel bag consists of five cans of a liter each, Petrol and Diesel bottles.

In addition, every bag is equipped with a 500ml fire extinguisher and two multi-shaped funnels to ensure a proper refilling.

AN ALTERNATE APPROACH

Refuel eliminates the luxury and an imminent fire hazard that come with fuel delivery through tankers, however compact and portable they may be. And to ensure a blazing fast delivery, our refuelers are highly skilled bikers as well!

Unsafe fuel handling, congestion at petrol pumps, pilferage and adulteration, and access of fuel in rural areas, are some of the problems Refuel focuses on extinguishing from the way down. It'll also help creating a fleet of employment of all kind.

THERMOCOL INFUSED BAGS

The insides of Refuel delivery bags are heavily imbued with ultra-lightweight thermocol sheets to maintain a neutral transposition throughout.

It also helps in a linear maintenance of the overall structure and topple down a notch, the chances of imbalance.
